Introduction

The purpose of the Uniform Tax Data Server Information schema and related fillable PDF form is to allow organizations that host tax data servers to compile data once and to distribute that data to each of their client tax software applications. This document describes the fields in the fillable sections that follow.

The desired result of using this format is to simplify the work done by tax data providers and facilitate more participation in the ecosystem.

Instructions

Basic Information

Contact and company information in this form is self-explanatory. The type of contact is optional but may be used to describe the specialty of the individual.

Server and Interface Information

Information about both OFX and FDX servers is provided. Schema versions, server URLs, and availability dates are listed.

Logos

In this section, list the URL from which logo files may be downloaded.

Some tax software applications use square logos while others use rectangular logos. Both are acceptable. Note that logos are generally shown in the upper left corner of the tax data import screen in the software.

User Interface

Fields

List the description for the document ID (USERID in OFX) and document code (PASSWORD in OFX) input fields.

Explanatory Paragraphs

Enter information to be presented to the user on the tax software data import screen.

Where the information should include a hyperlink, you may enter:

- The URL of the linked web page
- The text for the link
- A tilde (~) character in the paragraph location where the link should appear

Forms and Go-Live Dates

Check the box for each type of form supported and enter the date when forms will be available for import.

Testing Credentials

For each available test tax document, enter the document ID (or user ID) and document code (or password).
